

United States Government

Department of Energy  
Rocky Flats Field Office**memorandum**

DATE: FEB 03 1995

REPLY TO  
ATTN OF: ER:WNF:08093

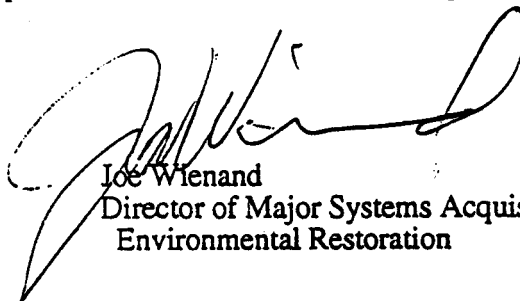

SUBJECT: Next Step on Operable Unit 15, Rocky Flats

TO: Claire Gesalman, EM 453, HQ

The enclosed letter from the State of Colorado approves the Final Phase I Operable Unit (OU) 15 RCRA Facility Investigation/Remedial Investigation Report. We are pleased that the State, with the Environmental Protection Agency's concurrence, accepted the results of our studies. With the acceptance of the Report, the activities planned and scheduled for OU 15 in the Interagency Agreement are complete. All Table 6 milestones are completed, the last two before the scheduled dates.

The State letter goes on to request that the Department of Energy provide a schedule to finish off OU 15 with a Final Corrective Action Decision/Record of Decision (CAD/ROD). We focused our efforts on proceeding to a CAD/ROD without preparation of an Interim Measures/Interim Remedial Action. The State agreed. EG&G has already prepared a schedule, calling for submittal of a Final CAD/ROD in June 1996. We will evaluate that schedule and furnish it to you as we prepare the response to the State.

If you wish to discuss this matter, please call Bill Fitch, OU 15 Manager, at (303)966-4013.

Joe Wienand  
Director of Major Systems Acquisition  
Environmental Restoration
